who owns the dwelling—the business property—that stands in
your name?

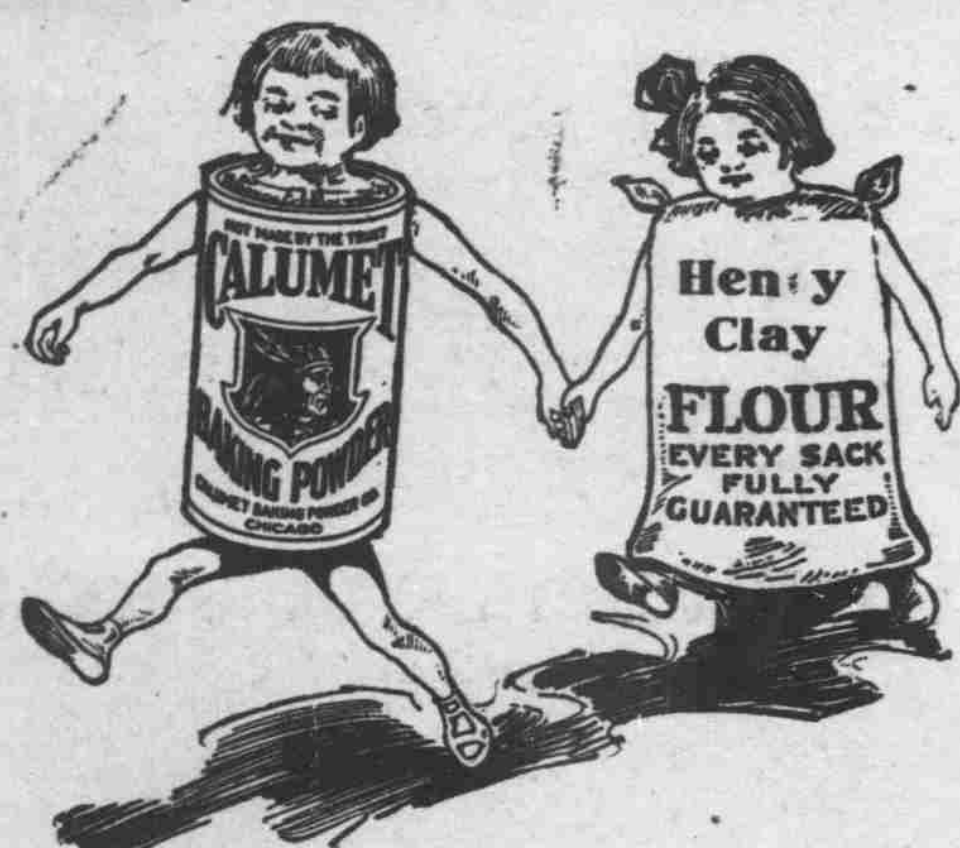

of course you think that you do; but are you right?

the question is worth considering, it involves the origin and the
development of individual ownership in land.

in the beginning of civilization no man owned any definite part of
the earth. nomadic tribes camped over particular sections of it;
homes and trading places were not fixed; land was too plentiful for
individuals to dispute over the occupancy of any particular spot.

Cheating the Cockerel.

Though hardly a physical hero, the
vicar had a stern sense of duty. That
is why, when some doubt arose as to
the safety of the church spire, he de-
cided to become a steeple-jack, for
the time being, in order to see for
himself what was the matter with it.

So pleased was he as having accom-
plished this quite easy feat that he
was never tired of talking about it.
His sensations on that memorable oc-
casion were dragged into every ser-
mon, Sunday school class, boys' club
meeting and stray conversation, until
the entire village was sick to death
of it.

It was on a certain market day that
he met his Waterloo. To a group of
farmers he was going, once more,
through his experiences.

"And," he was saying, "when at last
I reached the very pinnacle and found
myself gazing at the bronze weather-
cock—what do you think I did?"

"Dunno," muttered one old farmer.
"But I know what you ought to have
done."

"And what was that, pray?" queried
the vicar.

"You ought to have apologized to
the bird for doing it out of the job of
crowing!"—Answers.

Women Who Carry Milk.

In these days of down-with-every-
thing-old-fashioned there are milk-
women in the West end of London—
bronzed and sturdy creatures, in blue
print gown and red plaid shawl—
who carry the milk around to the
houses in cans slung from the yoke.
There is a firm which keeps up this
mode of delivery still; and if there
be people who think these women
might be better employed, let them
stand one of them beside, let us say,
a pale young shop assistant or tele-
phone girl or nursery governess! It
is a wonderfully erect and powerful
specimen of womanhood, this "area
belle," as she was called in the days
of punning, and is probably descended
from the "merry milkmaids" of Queen
Anne's time, who according to the old
prints, seem to have spent much time
in dancing to the music of a blind
fiddler—and a very healthy business,
too!

Porcelain Houses Next?

W. Hales Turner advocates the use
of porcelain in building our homes. He
says porcelain lacks the absorbing
qualities of brick, mortar, concrete,
woodwork and paper and declares that
an inch thick wall of porcelain glazed
on both sides will keep in warmth or
keep out the heat of the sun better
than an 18-inch brick wall can do. The
framework of such a house should con-
sist of rust-proof metal in which are
fitted panels of porcelain six feet long
by three feet wide and half an inch
thick, weighing five pounds to the su-
perficial foot. These may be decorated
or glazed and fitted with steam tight
joints, the whole house of a moderate
size being put up within a few hours.

Good oak or pine wood, any length,
prompt delivery. Phone 3M, four
rings. J. M. Potter. 18-6f

Sympathy.

Sympathy with pain is not the high-
est form of sympathy. Anyone can
sympathize with the sufferings of a
friend, but it requires a very fine na-
ture to sympathize with a friend's
success. Sympathy with joy intensi-
fies the sum of joy in the world. Symp-
athy with pain does not really di-
minish the amount of pain.—Oscar
Wilde.

The True Bravery.

There is as much true courage in en-
during with constancy the sorrows of
the soul as in remaining steadily on
the wall of a battery. To give one-
self up to grief without resistance, to
kill oneself in order to escape from
it, is to abandon the battlefield before
victory.—Napoleon.
